

Thank you for your interest in testing the new **SWCCG Decks** site.

The site is currently in alpha stage, so we do expect bugs to exist on the site.

It is also possible that you will encounter user experience (UX) issues.

Getting started

- Open your browser.
- Go to the Decks site: <https://decks.starwarsscgs.org/>
- 1. Navigate the site **without logging in**.
 - 1. *Are there any areas you can not access that you feel you should?*
 - 2. *Are there areas you CAN access that you should not be able to?*
- 2. **Login to the site**
You will be directed to the new SSO system. If you do not have an account yet, register an account. Be sure that your username matches the username you use on the Forums.
- 3. Find a card, and **comment on the card**.
- 4. Leave a **rating for an existing deck** that is not your own.
- 5. Leave a **comment on an existing deck** that is not your own.
- 6. **Create a new deck**.
 - 1. *Currently **can not add more than one card to a deck**.*
- 7. **Export your deck** as an XML **for GEMP**.
- 8. Go to [GEMP](#), **import** the XML file for **your deck in to GEMP**.

Testing with Multiple Browsers and platforms

- Try to test with a diverse selection of client platforms and client browsers.
- If you have a Desktop/Laptop, please test with Safari, Chrome, and Firefox.
 - Any `chromium` based browser counts towards Chrome, such as: Brave, MS Edge, Google Chrome, or Opera.
- If you have a smart phone, please test with the built-in browser, Chrome, and Firefox.
 - Dolphin Browser is an edge case and testing does not need to include the Dolphin browser.

Current Known Issues:

- Can not add more than one card to a deck.
- When clicking on the `Publish` button, it changes the name of the deck to `Un-named Deck`.
- Clicking the `Unpublish` button has no effect.

If you discover a BUG

- Go to the project hosted on **GitHub**: <https://github.com/swccgpc/decks>
- Click on the **Issues** tab: <https://github.com/swccgpc/decks/issues>
- Click on the **New Issue** button: <https://github.com/swccgpc/decks/issues/new/choose>
- The create a **Bug report**, click on [Get started](#)
- Complete the **Bug Report** to the best of your ability.

If you discover a user experience (UX) or quality of life issues, or would like to suggest an additional feature

- Go to the project hosted on **GitHub**: <https://github.com/swccgpc/decks>
- Click on the **Issues** tab: <https://github.com/swccgpc/decks/issues>
- Click on the **New Issue** button: <https://github.com/swccgpc/decks/issues/new/choose>
- The create a **Feature request**, click on [Get started](#)
- Complete the **Feature Request** to the best of your ability.
